If you listen to ICRT, you can hear all the newest pop songs.

ICRT can also tell you what the top ten pop albums are in Taiwan, Japan, America, the U.K., and lots of other places. ICRT 可以告訴你世界各地最熱門的流行音樂專輯排名。

But, you will never guess what pop album was in the top ten in Australia just last month... actually, it was in the top 5! Do you know why you will never guess? Because it's not a pop album! One of the top five albums in Australia last month was an album of bird sounds! 上個月澳洲排行前五名的音樂專輯，有一張不是流行音樂，而是鳥叫聲！

Bird sounds! Yep! Cool, huh? The bird song album is special. It has the sounds of more than 50 birds in Australia that need help. 專輯裡面聽到的 50 幾種鳥，都是需要幫助的鳥類。

If people don't do more to help these birds, they might go extinct! Like the dinosaurs. 如果不幫助牠們，這些鳥可能會像恐龍一樣絕種。

No more bird songs from these Australian birds... ever! So, some scientists recorded the birds' songs and made an album. People in Australia saw the album and said, "Yeah! I want to hear those bird sounds. And, if I buy the album, the money will go to help the birds!" **澳洲人想要用買專輯的方式來幫助這些鳥類。**

And then lots of people bought it! And pushed the bird song album into the top five! What a great story!
