A close-up photograph of a green motherboard's SATA interface. Three SATA connectors are visible, labeled SATA1, SATA2, and SATA3. A black SATA power cable is plugged into the SATA1 connector. A yellow callout bubble points to the power cable's multi-colored wires (red, green, blue, white) which are connected to a SATA power plug. A purple callout bubble points to the SATA1 connector itself. The motherboard has various components labeled, including BIOS_WP, R578, R597, CASE_OPEN, R1131, R1127, R334, R332, and Q54. The SATA1 connector is a black plastic port with a gold-plated SATA data connector inserted into it. The SATA2 and SATA3 connectors are orange plastic ports. The SATA power cable has a black plastic housing and a multi-colored wire bundle. The yellow callout bubble is a speech bubble shape with a tail pointing to the power cable. The purple callout bubble is also a speech bubble shape with a tail pointing to the SATA1 connector. The background is slightly blurred, showing other parts of the computer case and cables.
