We often say “as busy as a bee,” but do you know how bees have fun? Scientists wanted to know more about bees, so they did some tests with them. They found that they liked playing with small balls, just like humans. Young bees played with more balls than old bees. The boy bees play with balls longer than the girl bees.

In the tests, there were 45 bumblebees. These bees had two choices to make. The first choice was to go straight to a sweet treat. The second choice was to go around small balls before they get to the treat. Surprisingly, most of the bees decided to play with the balls first before they enjoyed their sweet treat. Scientists said bees have feelings, and their minds are smarter than we thought.

We don't have any other space for the pool. We can ask the school to move the giant trees to other places.

Last night I flew in outer space  
I flew so fast and far.  
A ship tried to race  
Me around a shining star.

Last night I had a pair of wings  
But still I couldn't fly.  
I had to watch other things  
Like birds flying by!

Last night I helped a dragon  
Without giving the fire.  
I gave it chili peppers  
And watched the fire shoot higher.

Last night I found some magic shoes  
Making me feel so tall.  
I jumped so high I couldn't lose  
When I played basketball.

Last night I painted my town  
In colors bright.  
Red, yellow, and brown  
What a beautiful sight.
