Relay Race 接点力型賽

There are more than 20 events for men and women in Track and Field, and relay is one of the most popular events. Relay is a competition in which runners of the same team hand over one baton and compete for victory based on the total time of the team. At international competitions, there are 4x100m relays in which four runners run 100m each, and 4x400m relays in which four runners run 400m each.
